The image shows a PNETLab topology diagram on the left and a QEMU window on the right. The topology diagram features two hosts: 'Win' with IP 10.0.0.10 and 'VPC' with IP 10.0.0.20. They are connected via a network consisting of two intermediate nodes labeled 'eth0'. The QEMU window displays a virtual machine running a web browser, showing the Instagram homepage. The browser's address bar indicates a secure connection to 'https://www.instagram.com/7hileen'. The QEMU window's title bar reads 'QEMU (Win)'. The background of the QEMU window is a grid pattern. The bottom of the screen shows a Windows taskbar with various application icons and a system tray with the time '8:43 PM' and date '09-Oct-26'. A 'HTTPS-INSPEC' label is visible in the bottom left corner of the PNETLab interface.
